*Katolieke Universiteit Leuven, Belgium*

# Would Rothbard call it money?

## content

Introduction

Example

Features

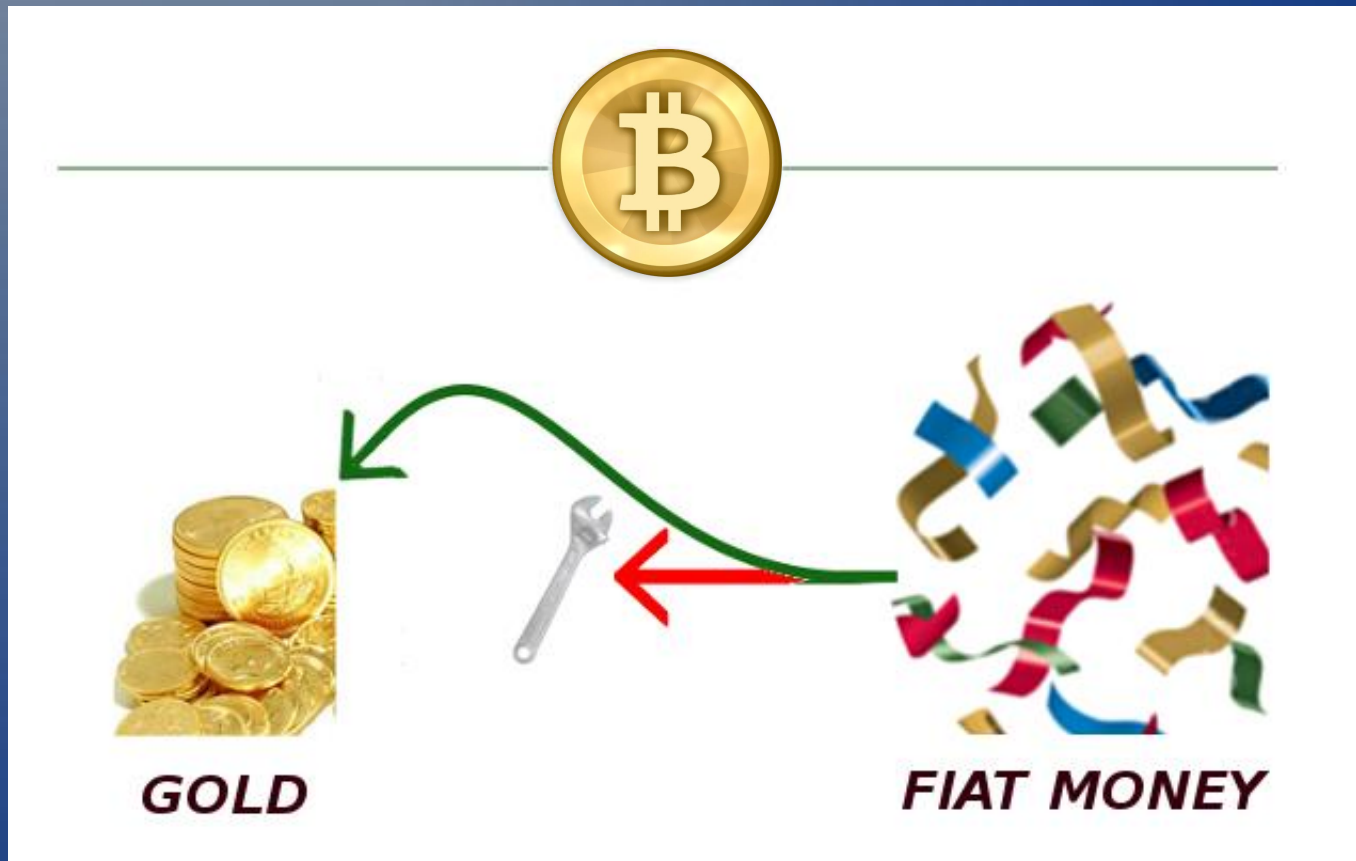

Bitcoin vs. Fiat money

Bitcoin vs. Gold

Viability as Money

# What is Bitcoin anyway?

a strange beast somewhere between gold and fiat

# What is Bitcoin anyway?

a strange beast somewhere between gold and fiat

Free market

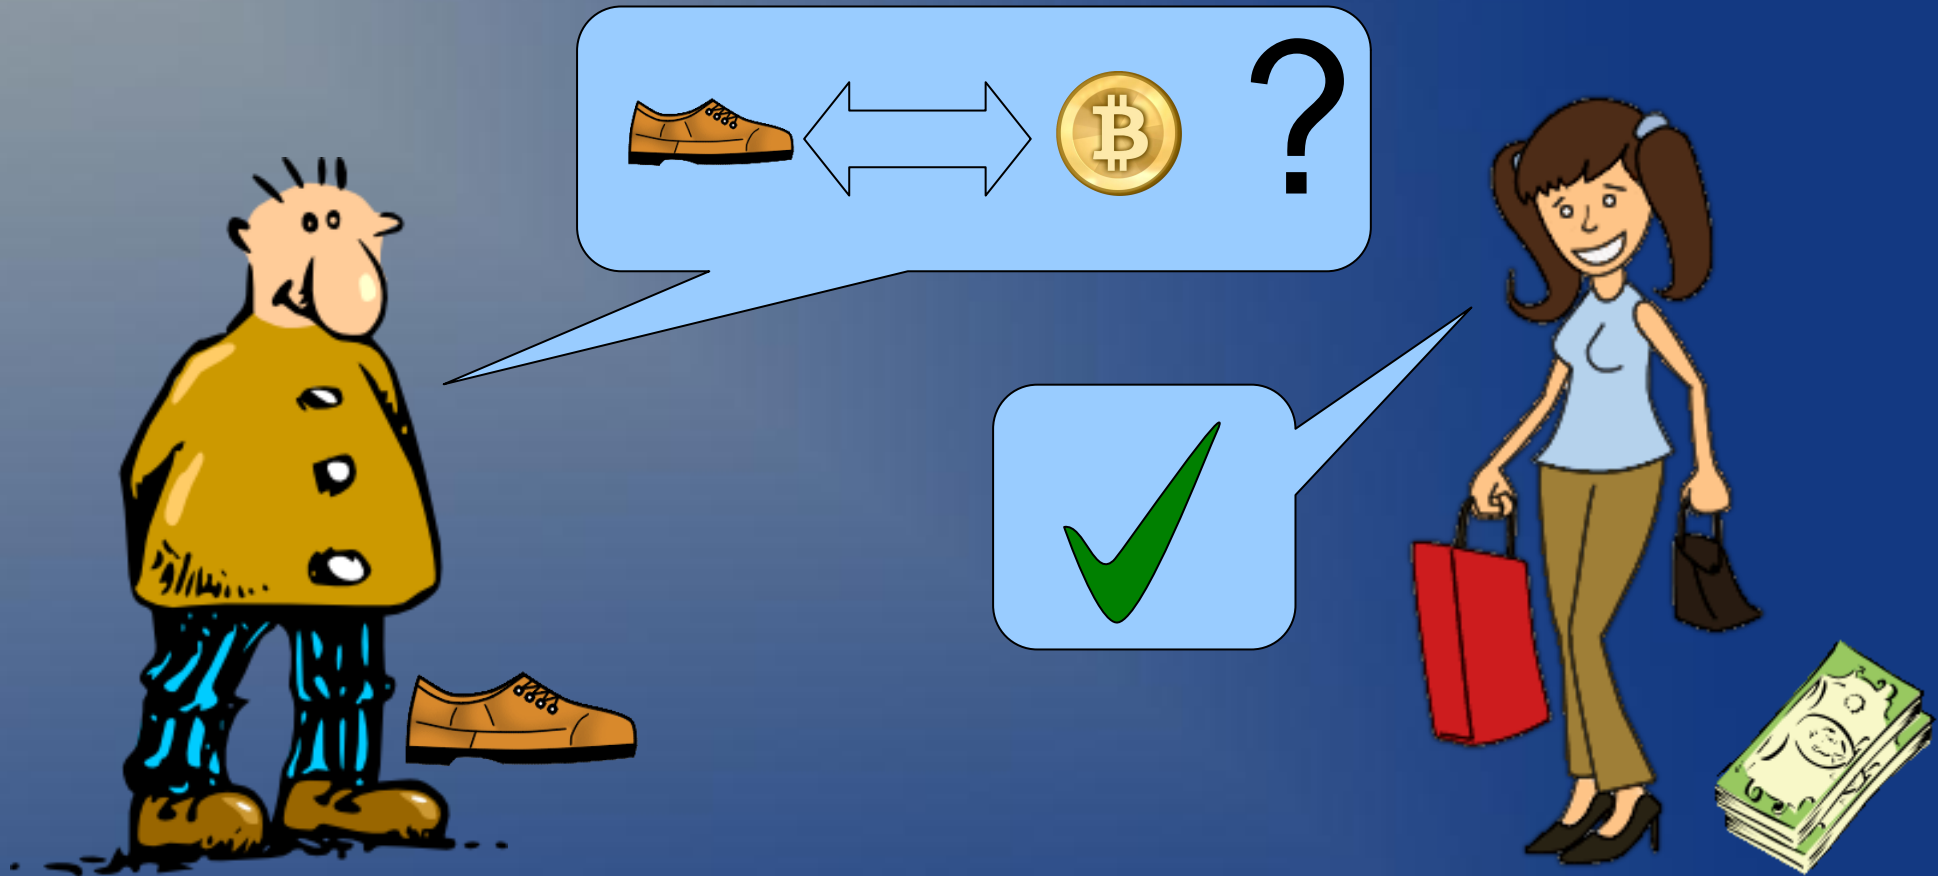

Internet currency

Decentralized

Pseudonymous

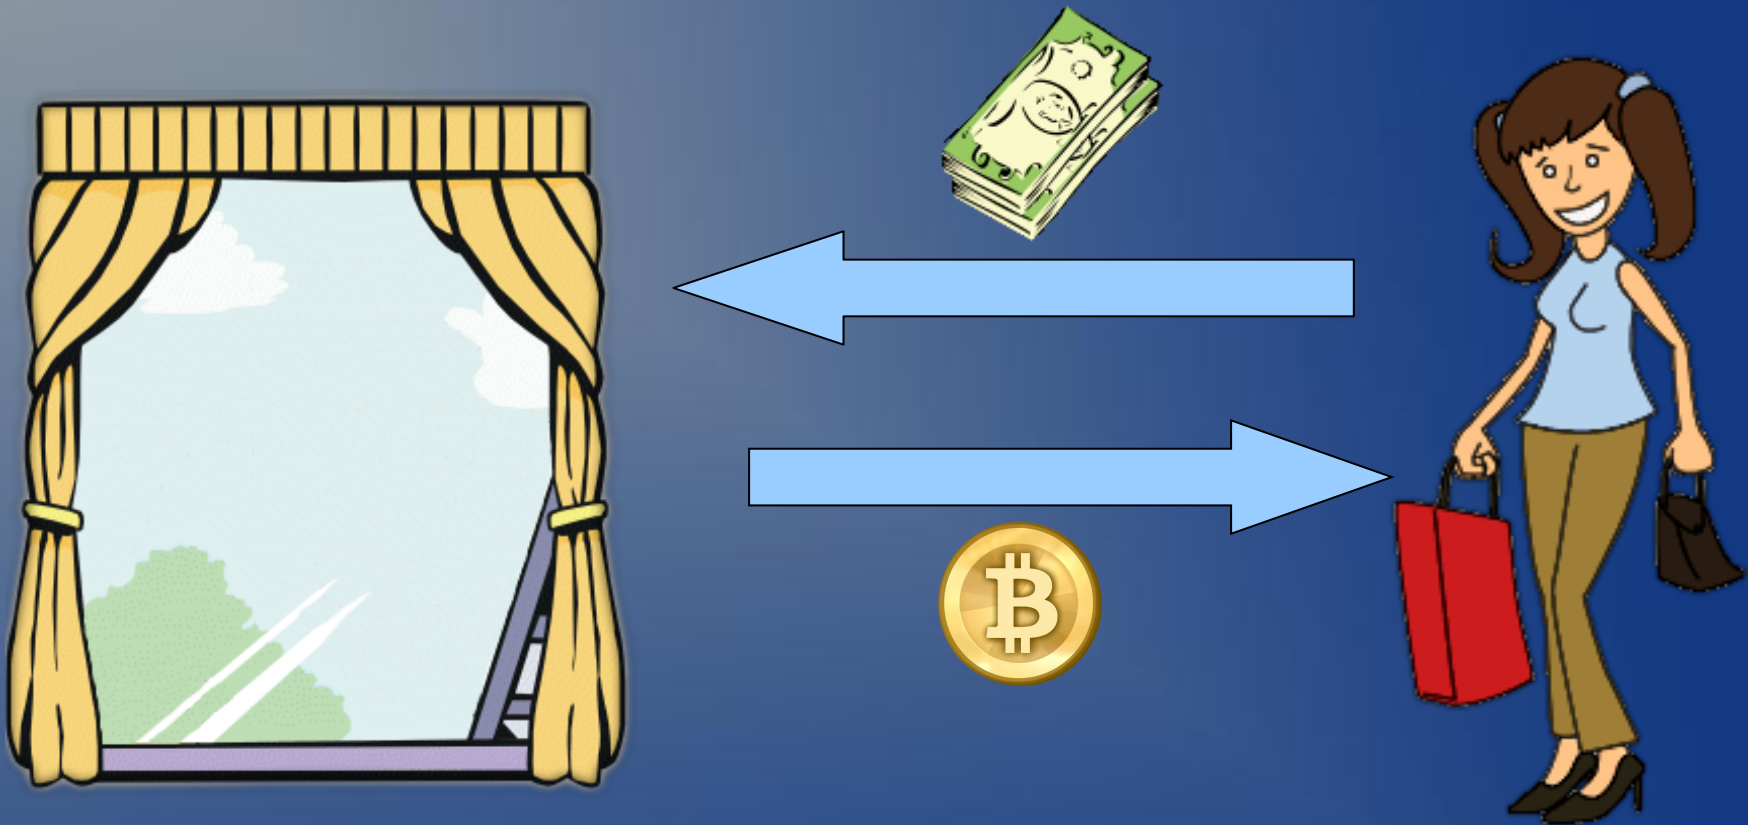

Fixed Inflation

# Bitcoin in action

Alice and Bob agree on an exchange

# Bitcoin in action

Alice buys Bitcoins through  
a Bitcoin exchange service

# Bitcoin in action

Bitcoin address

# Bitcoin in action

**Alice broadcasts transaction:**

- **Buyer**
- **Seller**
- **Price**
- **Transaction fee**

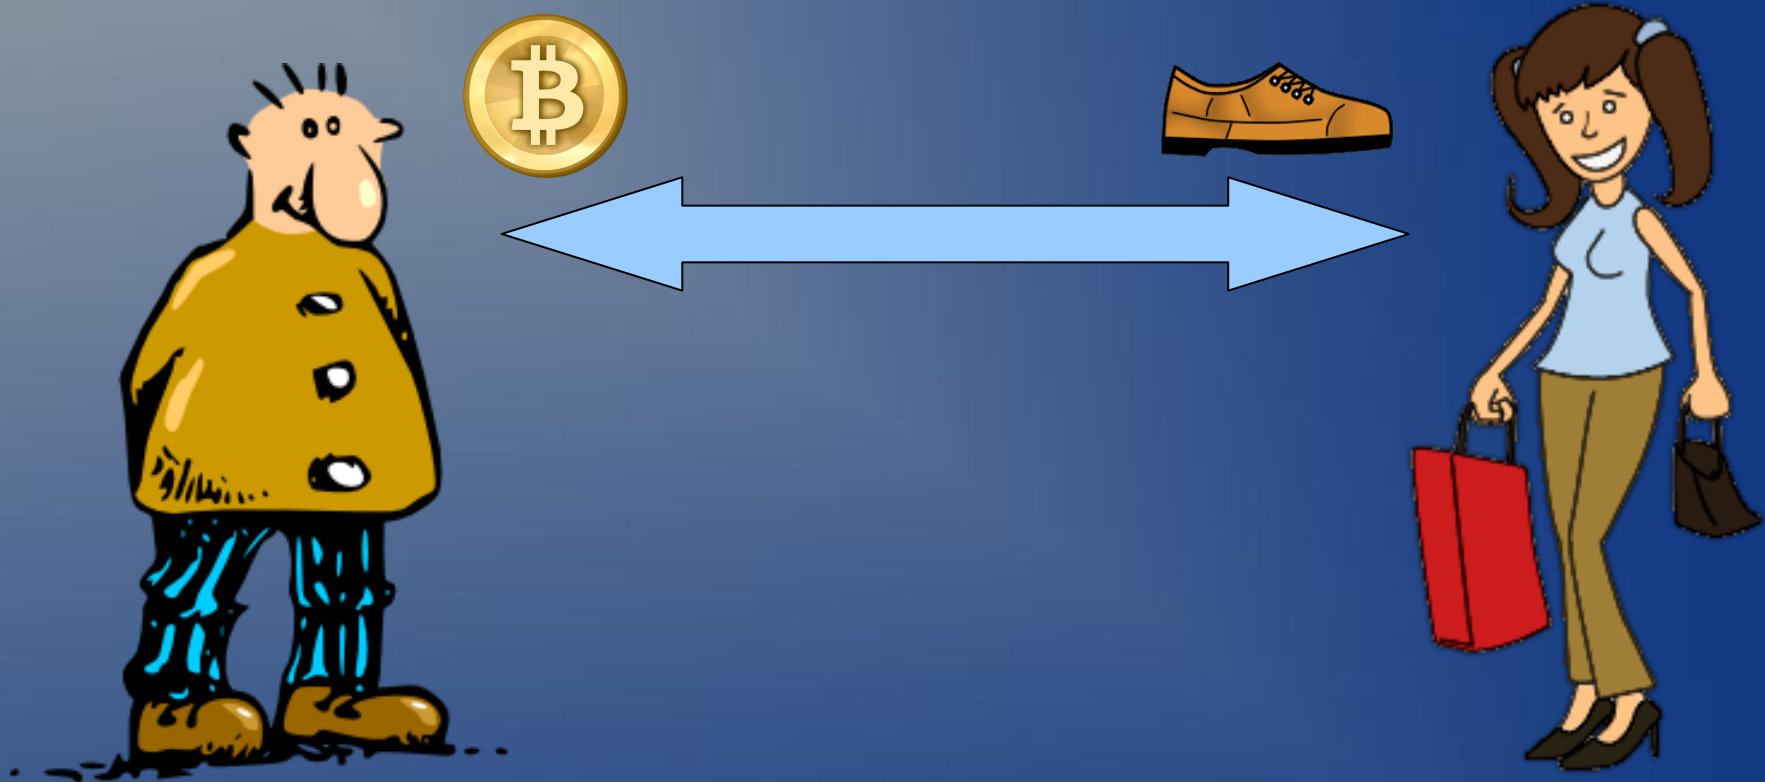

# Bitcoin in action

**Bitcoin community validates**

# Bitcoin in action

**Bob receives Bitcoins**

**Alice gets shoe**

# More on Bitcoin

*A Bitcoin does not exist!*

Bitcoins (BTC) is the unit

a Bitcoin user  
community

the Bitcoin

Bitcoins are **mined**

A record of all history: the **Block chain**

# Features

**Digital currency**

**Access via computer program**

**Communication with Bitcoin community  
through the internet**

# Features

**Decentralized**

**No central point of failure**

**Impossible to take down**

# Features

**Pseudonymous**

**Bitcoin account does not identify its owner**

**Perfectly traceable**

# Features

## Fixed inflation

**NO fractional reserve lending**

**NO quantitative easing**

**NO multiplier effect**

# Features

## Mining?

Miners expand the Block chain

Block: haystack problem

- Take apart straw by straw
- A needle is worth x BTC

# Is Bitcoin like *fiat money*?

## Practical aspects

Bitcoin	Fiat (bank)	Fiat (cash)
<b>Pseudo-anonymous</b>	<b>No anonymity</b>	<b>Perfect anonymity</b>
<b>Almost final</b>	<b>6 month reversal period</b>	<b>Perfectly final</b>
<b>Dependent on community</b>	<b>Dependent on bank</b>	<b>Independent; isolated</b>

# Is Bitcoin like *fiat money*?

## Financial aspects

Bitcoin	Fiat (bank)	Fiat (cash)
<b>Controlled inflation</b>	<b>Backed by nothing</b>	<b>Backed by paper cost</b>
<b>Depends on: Cryptography, Design Principles</b>	<b>Depends on: Private banks, Central bank</b>	<b>Depends on: Central bank</b>

# Is Bitcoin like *fiat money*?

Where do they derive value from?

Bitcoin	Fiat (bank)	Fiat (cash)
Gadgety	Legal tender	Legal tender
Speculation	Momentum of economy	Momentum of economy
Taxes not due in Bitcoin	Taxes due	Taxes not due in cash

# Is Bitcoin like gold?

## Practical aspects:

Bitcoin	Gold (Physical)
<b>Pseudonymous</b>	<b>Anonymous</b>
<b>Almost final</b>	<b>Perfectly final</b>
<b>Dependent on community</b>	<b>Independent; isolated</b>

# Is Bitcoin like gold?

## Financial aspects

Bitcoin	Gold (Physical)
<b>Controlled inflation</b>	<b>Fixed amount</b>
<b>Depends on: Cryptography, Design principles</b>	<b>Depends on nothing</b>

# Is Bitcoin like gold?

Where do they derive value from?

Bitcoin	Gold (Physical)
<b>Gadgety</b>	<b>Momentum of economy</b>
<b>Speculation</b>	<b>Speculation</b>
<b>/</b>	<b>Insurance</b>
<b>/</b>	<b>Physical demand</b>

# Viability as *money*

Is there enough *confidence*? In the ...

- medium
- provider
- users
- government

# Bitcoin: Summary

- **Bitcoin in Action: Alice and Bob**
- **Features (digital – decentralized – pseudonymous – mined)**
- **Bitcoin vs. Fiat money**
- **Bitcoin vs. Physical Gold**
- **Viability of Bitcoin as Money**

**Dziękuję bardzo!**

# Technology: a transaction

**A sender publicises the details of the transaction**

- **sender address**
- **receiver address**
- **amount to be transferred**
- **transaction fee**

**Community validates the transaction**

# Technology: a block

**A Block contains:**

- **reference to previous Block**
- **all recent transactions**
- **random padding**

**"Haystack" with  $x$  number of needles**

- **take apart straw by straw**
- **a needle is worth  $y$  amount of Bitcoins**

**Since every block references its predecessor, a chain of Blocks is formed**

- **The longest chain is the "real" one**
